

Portable High Power LED Stage Lighting Systems

Ready-To-Go LED Packages....

- ❖ System RSV-P1 - **£1,595.00** - 8 x (36 x 3W) RGB Stage Lights
- ❖ System RSV-P2 - **£1,995.00** - 8 x (18 x 8W) RGBW Stage Lights
- ❖ System RSV-P3 - **£2,195.00** - 6 x 50W RGB + 2 x 50W White Stage Lights
- ❖ System RSV-P4 - **£2,995.00** - 8 x (18 x 10W) RGBAW+UV Stage Lights
(All prices exclude VAT)

PLEASE NOTE: We do **not** offer 'budget end' stage lighting, of which there is a vast amount available elsewhere at prices far below our systems featured here. However, we **do** offer you a range of professional grade systems that will give you **superb performance** and **long term reliability**.

On all systems we offer you our upgrade option of personal delivery by one of our qualified engineers to your premises, set up, system programming and operator training - anywhere on mainland UK for **only £300 extra...**

That's the RealSound Difference.

Important Note: Please click here if you require an [Installed Stage Lighting System](#).

For your convenience, we have some configured complete portable lighting packages featuring appropriate lights, stands and controllers. Each system is differentiated by the model of the LED stage light fittings, offering you a choice to suit your particular budget.

- ❖ Every system features 8 stage lights giving you excellent lighting coverage of 4 lights per side. Many of these latest models now feature pure white LEDs, rather than having to mix full red, green and blue resulting in only a 'cold' white. Our P4 system also has amber LEDs so you can adjust the 'temperature' of the white light by adding or removing degrees of amber.
- ❖ A versatile but easy to use DMX lighting control desk is included.
- ❖ There are also 2 tripod floor stands. These extend up to 2.8m in height and feature a winch hoist facility for easy and safe elevation of the lighting bars when fully loaded.
- ❖ All interlinking cables and connectors complete each package.
- ❖ Optional extras are then offered. These include a full wireless DMX solution and transit cases for the lights themselves.
